Introduction to Metric Pattern Cutting

What Is Pattern Cutting?

Pattern cutting is the process of creating templates or patterns that serve as the blueprint for constructing garments. It involves translating design ideas into precise measurements and shapes that can be used to cut fabric and assemble clothing. Pattern cutting is fundamental in ensuring that garments fit correctly and achieve the desired aesthetic.

The Significance of Metric System in Pattern Cutting

The metric system, based on the decimal system, offers a standardized and straightforward approach to measurement, making it ideal for pattern drafting. It simplifies calculations, reduces errors, and ensures consistency across different patterns and sizes. Winifred Aldrich's emphasis on metric pattern cutting promotes accuracy and efficiency, especially important in industrial and mass production settings.

Core Principles of Winifred Aldrich's Metric Pattern Cutting

Systematic Approach

Aldrich advocates for a logical, step-by-step process in developing patterns. This systematic approach involves:

- Taking precise measurements
- Drafting basic blocks (slopers)
- Developing design variations from these blocks
- Ensuring consistency and fit at each stage

Use of Basic Blocks (Slopers)

Basic blocks or slopers are foundational templates that fit the standard measurements of a body. They serve as starting points for developing various styles and designs.

Emphasis on Ease and Fit

Aldrich stresses the importance of incorporating appropriate ease (extra space in a garment for comfort and movement) based on fabric type and garment style. Proper fit is achieved by adjusting patterns from the basic block.

Pattern Manipulation Techniques

The book details various techniques for altering basic patterns to create different styles, including:

- Darts
- Princess seams
- Gathers
- Pleats

Incorporation of Measurements

Every pattern begins with accurate body measurements, which are converted into pattern measurements using established ratio and proportion techniques.

Using measurements, a basic block is drafted on grid paper or directly on fabric. The key steps include:

- Drawing vertical and horizontal reference lines
 - Marking measurement points
 - Connecting points to form the basic shape
-
- Creating the Pattern Pattern

From the basic block, design modifications are made according to the style requirements. This may involve:

- Adding seam allowances
 - Adjusting darts
 - Shaping curves for necklines and armholes
-
- Using Pattern Manipulation for Design Development

Pattern manipulation involves:

- Slashing and spreading
 - Rotating darts
 - Drafting princess seams
 - Creating flare or taper effects
-
- Grading Patterns for Different Sizes

Once a pattern is developed, grading techniques are applied to produce multiple sizes, ensuring consistent fit across sizes.
