Understanding Client Centred Therapy

Origins and Historical Context

Client centred therapy, also known as person-centred therapy, was developed by Carl Rogers in the 1940s and 1950s. Rogers believed that every individual possesses an innate tendency towards growth and self-actualization. His approach marked a significant departure from traditional directive therapies, focusing instead on creating a supportive environment where clients could explore their feelings freely.

The new edition of the book offers updated insights into Rogers' principles, integrating contemporary research and practical adaptations suitable for today's diverse client populations. It emphasizes the importance of authenticity, unconditional positive regard, and empathic understanding as the core elements of effective therapy.

Core Principles of Client Centred Therapy

The therapy rests on three fundamental conditions that foster psychological growth:

- Unconditional Positive Regard: Accepting clients without judgment, regardless of their thoughts, feelings, or behaviors.
- Empathic Understanding: The therapist's ability to deeply understand the client's subjective experience.
- Congruence (Genuineness): The therapist's authenticity and transparency in the therapeutic

relationship.

These principles create a safe space where clients feel valued and understood, facilitating self-exploration and change.
